

APPLICATION

Multi-Stage Wax for Long-Term Protection

This multi-stage wax is formulated to provide long-term protection for a wide range of surfaces. It is designed to be applied in multiple stages, allowing for a thick, protective layer to be built up over time. The wax is highly durable and resistant to wear, making it ideal for use on high-traffic areas and outdoor surfaces. It also provides excellent water resistance and UV protection, helping to prevent fading and discoloration. The wax is easy to apply and can be used on a variety of materials, including wood, metal, and stone.

Recommended usage

- 1) Apply a thin layer of the PERFORMA™ SW-76 synthetic wax to the surface.
- 2) Allow the wax to dry for 15-20 minutes.
- 3) Apply a second thin layer of the PERFORMA™ SW-76 synthetic wax to the surface.
