

APPLICATIONS: Salt Water Resistance
Cable Water-Blocking
Resin Blends

SPECIFICATIONS:

Particle Size (µm)	45 - 300
Absorption Capacity (g/g deionized water)	> 280
Bulk Density (g/l)	400 - 800
Moisture (%)	< 10.0

Chemistry:	Potassium Acrylate/Acrylamide copolymer
Appearance:	Free flowing white granules
Storage:	Indefinite providing unopened containers/bags stored in dry conditions
Packaging:	Multi-wall bags and supersacks

Technical information is based on current knowledge and
